Technical Skills

LLM / GenAI: Claude and Gemini APIs, tool calling, structured output, RAG (hybrid search, pgvector, reranking), LLM evaluation (gold sets, metrics), prompt-injection defences

Languages: Python, TypeScript, JavaScript, SQL | **ML / NLP:** scikit-learn, PyTorch, Hugging Face Transformers, Sentence-BERT, Pandas

Backend / Frontend: FastAPI, Node.js, Express, React, REST APIs | **Data:** PostgreSQL, pgvector, SQLite, Chroma

Tools: Git, GitHub Actions CI, Docker, Claude Code (AI coding agent), AWS (EC2, S3) | **Spoken languages:** English, Hindi, Tamil, Urdu

Projects (click a title for the case study, code and demo video; all data fictional)

KnowledgeOS – Document Q&A with checked citations Python, PostgreSQL + pgvector, Gemini | 2026

- Hybrid keyword + vector search with a local reranker; code checks every citation and withholds an answer that fails.
- 32 of 33 answers passed the citation check on a real-model run (52 test questions, one run); 1,314 automated tests.

DocIntel – Invoice extraction with human review Python, FastAPI, PostgreSQL, Claude | 2026

- The model extracts fields; code validates formats, dates and on-page presence and sends doubtful values to a review queue.
- 387 of 390 fields correct on 30 synthetic invoices (Claude Haiku 4.5, one run); 658 automated tests.

Explainable ATS – CV screening with quoted evidence TypeScript, Express, React, PostgreSQL, Claude | 2026

- The model proposes verdicts with quotes from a redacted CV; code verifies every quote and does the scoring; a recruiter decides.
- 59 of 68 verdicts matched reviewed labels on 20 invented CVs (one run); 886 automated tests.

Inbox-to-CRM Agent – Email to CRM with human approval TypeScript, Node.js, React, SQLite, Gemini | 2026

- Extracts enquiries, matches CRM records and drafts replies; consequential actions wait for a person's approval.
- 0 unsafe actions in 3 real-model runs on 10 emails; all 12 attack emails sent to a person in the latest run; 1,103 tests.

VoiceDesk – AI receptionist dialogue layer Python, PostgreSQL, Claude | 2026

- Seven booking tools over a calendar, typed text (voice not connected): 10 of 12 task scenarios passed (one run, 17 scenarios).

Sales Recovery Agent – Store support chatbot with guardrails Node.js, SQLite, Chroma, Gemini | 2026

- RAG over store policies plus order and discount tools, checked by code after the model: 21 of 21 cases on a fresh real-model run.

AI Claim Verification System Python, Sentence-BERT, BART-MNLI | 2025

- Retrieves evidence by semantic similarity and classifies claims as Supported, Refuted or Neutral with natural language inference.

Internships & Freelance

Freelance AI Developer – Fiverr Mar 2026 | Remote

- Built a resume-screening ATS in Python and Streamlit for a client: parses CVs, matches them to a job description and ranks candidates. 5/5 client review.

NLP Engineer Intern – Cognifyz Technologies Oct 2025 – Dec 2025 | Remote

Data Analyst Intern (IBM program) – All India Council for Technical Education (AICTE) Jan 2024 – Apr 2024 | Remote

Web Developer Intern – Afame Technologies May 2023 – Jul 2023 | Remote

Education

B.S. Abdur Rahman Crescent Institute of Science and Technology, Chennai 2022 – 2026

B.Tech in Artificial Intelligence and Data Science | CGPA: 7.1/10
